

ISRAEL PHYSICAL SOCIETY - 9/12/04 - TECHNICAL SUPPORT

Technical Support for Plenaries and Sessions in 323, 001: Larissa Patalgen all day with assistance from Yaacov Slutzker (2869 or 048292869) in plenaries and afternoon parallel sessions. They could be in the lecture preparation area if not in the lecture rooms. Technical support elsewhere: Izak Gertner who can be reached in the Lidow foyer at ext. 3035 (048293035) during IPS2004.

Rms 323 and 001 - both have a computer projector, a computer (windows) that can read DOK, an overhead projector, and the possibility to connect a laptop to the computer projector. If you wish to use your own laptop, please contact Larissa or Yaacov before the plenary sessions, i.e.

- morning session, Yaacov or Larissa before 9:35,
- afternoon session, Larissa during the lunch break.

Session organisers allocated 001 or 323 (Lior Klein, Steve Lipson, Michael Elbaum, and Nadav Shnerb) please collect a small session pac from the registration desk that will contain last minute announcements, or material not yet in 001 or 323.

Each room except 001 and 323 (that is all Lidow and Ullmann) will have a monitor who will collect a more substantial session pac (including chalk, pens etc) and be responsible for contact with Izak Gertner for technical support if needed during the session. Monitors in Lidow rooms should know that the computer projectors cannot be left unattended. As Izak Gertner will go to Ullmann around 10:30 to set things up - morning Lidow monitors should contact him previously.

These rooms (Lidow and Ullmann) will have two projectors - overhead and computer, but NO COMPUTER YET unless mentioned who is bringing one. Session chairs might like to arrange for speakers who cannot bring a laptop to use another speaker's laptop. We do not have computers for these rooms. Speakers should contact their session chair if they need help on this. If the chair or a speaker or another participant can volunteer a laptop please let Joan Adler (phr76ja@tx.technion.ac.il) know and she will update the list.
